Baï FloraPlant®

MixMasters

Grow 15 perfectly complete combos

MixMasters 2.0 single-stuck multiliniers are the only mixed container program that gives you:

- 100% complete “recipes” that are perfectly balanced with nothing missing.
- Better finished performance since each variety is individually propagated and custom-treated.
- More innovative mixes because 2.0 allows for greater diversity.

The MixMasters 2.0 formula for success: 3 liners fuse together into 1 healthy multiliner that you use to grow winning combos.

You can also grow MixMasters from standard 207 rooted liners sourced from your local rooting stations.

Transplant the combined sets of liners in a single hole in the finished container, and they'll grow together with the same blended results as the 2.0 technique. You can also have a quick finish with 21-cell liners.

Do it yourself with MixMasters 207 rooted liners.

Whatever process you choose, you can count on MixMasters' performance. Turn the pages to check out these 15 trialed and tested combos. **Grow winning combos *your way!***
